Attachment notes

AT44	Favourite with Robinson owners. Safest and easiest to use on market.
AT45	Most polyvalent attachment system. Works with most helicopters Short or Long central bar available. Includes one pair of cups (S mall, M edium, L arge, SL anted) Includes one central bar (R egular, XL extra long)
AT46	Low version of AT45 oo be used with the V610 Low tow cart
AT47	Attaches to vertical skids (triple axe rotation capability)
AT120	Attaches to underbelly central structure tube
AT412	Attaches to skid anchor ring for pop-out float equipped skids
OATL	Aircraft towing hook. Can be used with any aircraft tow bar (not included). May be used with multiple ball size or pin hook.

Quick Connect Jack head:

The Quick Connect system allows for operators to change from one attachment device to the next in seconds. The sliding disk is locked into place with a safety pin. The Quick Connect system is a feature on all tow cart models equipped with an electric lift. A Great Advantage!
