Swivel wheel : 4" (10cm) Hard  
Lift : Manual Hydraulic (blue)

#### Recommended application

R22 & R44 helicopters on regular surfaces.

### Limited Edition : V90

Economical version of V102.  
With single swivel wheel and rigid arm.

Same high quality motors & controller!

## Features:

### Safest Attachment System on Market!

The AT44 attachment system is easy to use.  
Aluminum bar slides-in to lock ball into position  
Prevents ball from slipping-out on bumps

### High Quality Electrical System

**Motors:** Each traction wheel powered by a 300w motor.

**Battery charger:** Automatic 115/230v included

**Batteries:** Requires 2 x 12 volts deep cycle known as "Marine type" or "RV". These are readily available from local retail stores worldwide. Not included with tow cart to keep freight charges to a minimum.

### Impressive Precision

Units are equipped with a high quality controller  
This allows for very delicate control on maneuvers  
Units can be operated at very slow speed up to a brisk walking pace.

### Immediate availability

In stock,  
Shipping worldwide

### Safe & Easy Control System

On/off button on control bar  
Red thumb action button to trigger movement  
Incredibly precise movement  
Operation from very low to fast walking pace speed  
Proportional speed electronic controller  
Releasing action button interrupts all traction power  
Forward / backward operation set with speed dial  
Totally silent & fume free  
Long Range

Ultra-Compact storage  
with Foldable Arm
