

*Ideal for Landing on Snow or Soft Terrain*

**For AS350**

**For R44**

**New Pads:**

*Larger Size for more support  
& Streamlined for easier flow of debris*

**Model :** BP350  
**P/N :** 112 0002 00 B  
**Weight:** 18.3 lbs / 8.5kg

**Model :** BP44  
**P/N :** 112 0001 00 B  
**Weight:** 6.9 lbs / 3.1 kg

**Design:** The new BearPaw pads offer a streamlined profile to prevent them from collecting dust and rocks. The openings also allow water to flow out easily. The new bearpaw profile was submitted to a finite element analysis to obtain an optimal lightweight / sturdiness ratio configuration.

**Components:** The Bearpaw pads are made of high quality materials for long lasting units. The pads are made of Corrosion Resistant UHMW . These provide an excellent sturdiness-flexibility ratio for landing on rough surfaces. The U-clips that attach to the skids are made of stainless steel covered with a protective material for smooth contact with skid surface.

**Certifications:**  
Canadian: STC no SH-06-24  
United States: STC no SR02432NY  
Australia & New Zealand: Use of US STC.

**Iceblades:**

*Reduce risks of skidding on ice  
& Extend pad life*

**Iceblades:** Helitowcart introduced iceblades for bearpaws to provide better traction on clear ice. This reduces risks of helicopter skidding on ice. Iceblades also offer extra protection to pads especially for helicopters used for training. Iceblades are included with the BearPaw kit.
